About Us

At Muhammad Hadi Al-Juhani Trading Establishment, we embarked on a journey long ago to transform various transportation methods and energy solutions to align with Vision 2030. Our focus is on transitioning from traditional energy sources to electric power. This involves customizing golf carts for diverse purposes and transforming conventional transport systems into highly efficient electric vehicles. As authorized agents and distributors for several global brands dedicated to advancing this sector, we possess extensive expertise in managing such initiatives. Our track record includes successfully operating many high-quality projects with Govt. Corporate and private sector as well as individuals.

The notable shift in the current automotive industry is focused on addressing the growing need for larger, high-performance, reliable components that are lightweight in order to meet fuel efficiency standards at a reasonable cost while also meeting safety standards.

At Hadi Est., we take pride in being a provider of environmentally friendly transportation and mobility solutions, we offer unique and personalized electric carts and vehicles to our partners, customers, and clients in the government, corporate, and private sectors according to Vision 2030.

Branding

Branding Services

We understand that luxury is defined by exceptional quality and craftsmanship. Therefore, we offer and assist you to select the carts that embody these values. We work closely with you to identify the most suitable luxury products that align with your brand image and meet the preferences of your target market, which are designed to meet and exceed your expectations, ensuring that the products will reflect prestige associated with your brand. Effective branding involves strategic use of logos, vehicle wraps, and consistent visual elements to create a strong and memorable brand identity.

We recognize that personalization is a key aspect of branding. Our services can incorporate personalized features and upgrades, such as custom-made interiors, customized branding, and any other enhancements that will help differentiate your fleet and reinforce your brand identity.

Branding Elements:

Logos: A logo is the visual symbol that represents your company. It encapsulates your brand's essence and communicates its values.

Vehicle Wraps: These are custom-designed graphics applied to vehicles. Wraps can feature logos, slogans, and other brand elements. They serve as moving billboards, reinforcing brand visibility.

Consistent Visual Representation: Ensuring uniformity across your fleet is crucial. Consistency in colors, fonts, and overall design reinforces brand recognition.

Identity: Branding defines who you are as a company. It influences how customers perceive you and sets you apart from competitors.

Modification

Modification

We understand that one size doesn't fit all. Our cart modification services allow you to customize carts according to your unique use cases.

Functional Enhancements: Whether it's adding compartments, adjusting heights, or incorporating specialized features, we modify carts to enhance their functionality.

Branding Integration: If you have specific branding requirements, we seamlessly integrate logos, colors, and visual elements onto the carts.

Safety Upgrades: Safety is paramount. We can install safety features such as reflective strips, handles, and locking mechanisms.

Ergonomics - Our modifications consider ergonomics, ensuring ease of use for both customers and staff.

Purpose-Driven Modifications: We analyze your vehicle's purpose—whether it's a delivery van, service truck, or passenger vehicle—and tailor modifications accordingly.

Cargo Space Optimization: For commercial vehicles, we optimize cargo space. This may involve installing shelving, partitions, or custom storage solutions.

Accessibility: If your vehicle serves specific populations (e.g., wheelchair users), we modify it to ensure accessibility.

Performance Enhancements: From engine upgrades to suspension adjustments, we enhance vehicle performance based on your requirements.

Aesthetics: Whether it's a fresh coat of paint or custom decals, we can modify the vehicle's appearance to align with your brand.

Our modification services are flexible, adaptable, and designed to align precisely with what you need. Let's transform your carts and vehicles to better serve your goals.

Event Management

Event Management

Event management transportation services play a crucial role in the successful execution of any event. These services encompass a wide range of solutions, including sale / Rental Services, special permitting, escorts details, valet parking, and day-of onsite coordinating. They ensure smooth and efficient transportation for all attendees, from arrival to departure.

We offer these services with extensive experience in managing transportation in the kingdom. We understand the unique challenges of each city and convention center and can provide in-depth local expertise. Our Mission is to move people safely and reliably while delivering a personal and positive experience that aligns with the client's goals. These services often include advanced technology solutions, such as real-time pick-up information and detailed ridership reports.

Effective transportation systems ensure punctuality and safety while enhancing the overall experience through convenience and efficiency. From services for guests to cargo transport for stage setups, these systems require meticulous organization and real-time communication capabilities. Advanced technologies like GPS tracking and mobile apps have become essential tools in managing these complex networks, ensuring that every element arrives at its destination on time and without incident.

GPS & Geo Fencing Services

GPS Services

Geo Fencing

We Provide GPS and Geo-fencing services, advanced location-based solutions that enhance location-based experiences and enable targeted interactions and enable businesses and individuals to create virtual boundaries around specific geographical areas. These services utilize technologies such as GPS, RFID, WIFI, and cellular data to monitor and manage the movement of devices within these boundaries. Geo-fencing can trigger customized actions when a device enters or exits a designated area, such as sending notifications, displaying targeted ads, logging attendance, or activating security measures.

This technology is widely used in various industries for applications including marketing, fleet management, asset tracking, and security. With real-time updates and analytics, geo-fencing services offer valuable insights into user engagement and operational efficiency.

INSURANCE

We take pride in providing complete and comprehensive insurance coverage for all electric vehicle (EV) carts, buggies, shuttles, and buses. We understand the importance of protecting these valuable assets and ensuring peace of mind for our clients.

With our tailored insurance packages, we strive to shield our clients from unexpected risks and potential liabilities, allowing them to focus on their core operations without worry. Our commitment to offering top-notch insurance solutions underscores our dedication to supporting the growth and success of EV transport operations. Rest assured, your fleet is in safe hands with our reliable and comprehensive insurance coverage.
